Junior Professor Chair (tenure track position) - Environmental Public Policies in a Global World (F/H)

HIRING DATE 03/11/2025 **LOCATION** 60 RUE MAZARINE 75006 PARIS
SCHOOL PSL

WORKING ENVIRONMENT AND CONTEXT

HOSTING STRUCTURE

Université PSL is launching a call for applications for a Junior Professor Chair in Economics titled "Environmental Public Policies in a Global World," based at the Department of Economics of École Normale Supérieure-PSL, part of Université Paris Sciences et Lettres.
This is a tenure-track position with a reduced teaching load leading to a permanent professorship within the Department of Economics at ENS-PSL and the UMR PJSE (https://economie.ens.psl.eu/).
The position can start from 2025 November or at a mutually agreed-upon date.
The position is open to all researchers wishing to develop their activity in environmental economics. The position includes a competitive salary and start-up funds at an international level.
Wholly committed to excellence in education, training and research, PSL is a global university, which aims to reflect, represent and influence society today and the world of the future in all its diversity. The university's collegial ethos is a major asset. Made up of eleven component institutions, including Ecole normale supérieure, PSL ensures that dialogue takes place between all areas of knowledge, innovation and creativity in science, humanities, social sciences, arts and engineering. PSL offers an education led by the research carried out in its laboratories while encouraging discussion and mobility between disciplines and across schools. Our university exercises critical thinking and fosters creativity. Students are selected on the basis of their potential and talent. The university champions equal opportunities and promotes social, cultural and geographic diversity, and students are guaranteed individual mentoring, small class sizes and personalized academic pathways.

The Department of Economics at ENS-PSL hosts active researchers in various fields of the discipline and provides training for economist students; it aims to strengthen its focus on environmental economics. The Center for Education on Environment and Society (CERES) at ENS-PSL is closely linked to the Department of Economics and offers an interdisciplinary range of courses on the environment. It also consolidates the resources and efforts of ENS-PSL around these issues, relying notably on the TERRAE program and the Master's in Sustainability Science. Finally, the UMR PjSE is the economics laboratory under the tutelage of ENS-PSL, comprising around a hundred researchers from all fields, and is at the forefront of international rankings in the discipline. It has prioritized environmental themes in its activity program, with strong needs for supervision at the master's level and a very dynamic research subject on which the laboratory wishes to strengthen its approach explicitly linked to public policy issues.

TEACHING MISSION

ECONMICS DEPARTMENT ENS-PSL

The position will involve offering courses on environmental policies at the master's level, integrated as an option in both the Department's Economics master's programs and the interdisciplinary PSL Master's in Sustainability Science.

The recruited individual will also be involved in the PSL minor "Public Action," in connection with CERES activities. These courses will be taught in English.

The CPJ holder will have a reduced teaching load during the pre-tenure period (42 hours of teaching per year).

RESEARCH MISSION

ECONMICS DEPARTMENT ENS-PSL L'ENS-PSL

Decision-makers and citizens face biochemical and geophysical threats that cannot be considered without their interaction with economic, social, and political issues. Conversely, to envision a model centered on human development and well-being, economists must broaden their analyses of market efficiency and inequalities to incorporate the various parameters of the transition.

The recruited individual will need to use economic analysis to model and evaluate the behavior of key actors with two focuses:

- **Geographical scales (situation of poor countries in a globalized world: Exposure to disasters, issue of compensations)**
- **Normative analysis of well-being to found public policy recommendations**

In line with contemporary empirical research, the recruited individual must be able to address these issues with granular data, which various statistical and computational tools allow exploiting with increasing efficiency.

GURGAND Marc gurgand@pse.ens.fr

NON DISCRIMINATION, OUVERTURE ET TRANSPARENCE

L'Université PSL s'engage à soutenir et promouvoir l'égalité, la diversité et l'inclusion au sein de ses communautés. Nous encourageons les candidatures issues de profils variés, que nous veillerons à sélectionner via un processus de recrutement ouvert et transparent.
